"traditional" research and action research, but could say more about why the latter approach is most appropriate for this PoP. The author identifies overly broad audiences for the study rather than narrowing the scope.	Strong The author demonstrates a firm grasp of the difference between action research and "traditional" research and uses this section to explain what resolving the PoP would mean and to whom. Primarily focused on creating local change, the author also identifies specific audiences who might be interested in the outcomes of the prospective study.

Feedback to Learner

The core of your draft presents a viable action research topic. Work on overall format and flow so readers will see that without having to hunt for it.
